>>>think about the word 'methodology', in contrast to 'methods':
_the architects, and their methods; the methodology of architectural design; the methodology of understanding architecture, and architectural design in particular.

>>>what happens when an academician behaves like a designer, or uses methods as a designer? or does the formation of designer raise the ability to speculate?

>>>define a "science of design", in contrast to natural sciences, as well as social sciences. or create an institute of design sciences, instead of institute of sciences and technologies.
